PROJECT UNDERTAKEN

Traffic flow forecast using time series anlaysis based on machine learning
- The "Traffic Flow Forecast using Time Series Analysis based on Machine Learning" is developed by using LSTM Algorithm this project aims to develop an intelligent and data-driven system that accurately predicts traffic flow patterns in a specific area.
- Traffic flow forecasting is crucial for effective traffic management, urban planning, and optimizing transportation systems. By applying machine learning techniques to historical traffic data, we seek to provide real-time predictions that can assist commuters, city planners, and traffic authorities in making informed decisions
